EDUCATION

University of Mumbai

Bachelor's of Science in Information Technology – **CGPA 9.55**

Mumbai, Maharashtra

July 2022 – July 2025

Manipal Institute of Technology

Master's in Computer Applications – **CGPA 8.59**

Manipal, Karnataka

Currently Pursuing

WORK EXPERIENCE

aiRender, Software Engineer Intern

May 2026 - Present

- **Delivery Route Tracker:** Built an Android tracking app (Kotlin, Jetpack Compose) using Foreground Services and Room DB for battery-efficient 8+ hour GPS monitoring.
- **Geospatial Processing:** Integrated OSRM Map Matching API to snap raw GPS traces to road networks, architecting a custom batching system to bypass API rate limits.

PROJECTS

Self-Healing Causal Digital Twin | *Python, PyTorch, Plotly, RL*

[Code](#)

- Built a digital twin using causal inference to handle distribution shift in industrial environments.
- Implemented NOTEARS-based DAG learning to detect structural breaks and update causal graphs in real-time.
- Trained a PPO agent with causal graph attention masks for zero-shot failure adaptation.
- Added an LLM layer to translate causal deltas into human-readable alerts.

NeuroDB – AI-Powered Database Platform | *Next.js, React, MongoDB, PostgreSQL, Gemini AI, NextAuth*

[Code](#)

- Built a full-stack SaaS platform using LLMs to convert natural language into executable SQL and NoSQL queries.
- Wrote a secure API backend with auto schema detection for PostgreSQL, MySQL, MongoDB, and CSV/Excel uploads.
- Added query validation middleware to block SQL injection and destructive operations.
- Designed a multi-tenant dashboard with NextAuth RBAC, Recharts data visualization, and context-aware chat history.

SKILLS

- **Programming:** Python, Java, C++, Kotlin, JavaScript, Bash
- **Machine Learning & AI:** PyTorch, Reinforcement Learning (PPO), Causal Inference, Gemini AI, LLMs
- **Web & UI Frameworks:** ReactJS, Next.js, Dash, Plotly, Jetpack Compose, Three.js
- **Databases & Backend:** NodeJS, PostgreSQL, MongoDB, Room DB, NextAuth
- **Tools & DevOps:** Docker, Kubernetes, GitHub Actions, AWS (EC2, S3), Git, SimPy, Vosk, OSRM

ACTIVITIES AND LEADERSHIP

Team Lead – 19th Aavishkar Research Convention (Zonal Round)

University of Mumbai

- Led a UG-level research project titled “Abhaya – SOS Emergency Assistance App” under the *Engineering and Technology* category. Coordinated project development, team responsibilities, and presentation.

Tech Support Volunteer – UTSAV MAHE Fest

MAHE, Manipal

- Assisted judges in using a web-based judging portal and resolved basic technical issues during live events

CERTIFICATES –

1. Java Programming Fundamentals Specialization - [Coursera](#)
2. Virtualization, Docker and Kubernetes for Data Engineering - [Coursera](#)
